[Trilling_project.xlsx](#)

Hi Nikia,

Attached I am sending you the data we sampled last fall for my student Jared Trilling's project. This is the data of 10 sites designated with white and gray.

Jared has been doing a lot more sampling this summer and he is just processing those data. Our sampling is not restricted to west of Montana Tech but targets more of the BPSU.

Our aim is to find the relationship between certain soil conditions (pH, certain contaminants) and plant species.

Best wishes,

Robert

Thanks Robert,

We would be interested in all the data you and your team gather. I have copied the CDM team so that they can stay up to speed on what you are sending.

Thanks,

Nikia Greene

Hi Nikia,

I received your phone message, sorry I couldn't get back earlier. I will send you our existing xrf data on Monday, however, we will have hundreds of more coming in the next couple of months associated with our vegetation surveys.

Have a great weekend, Robert
